Alloy dispenser

With a capacity of 30 (66 lbs) or 60 kg (132 lbs) the alloy dispenser is totally made from stainless steel. It is mounted on a painted steel stand which allows it to move up and down.

It is fitted with a thermostat that allows temperature control inside the pot.

A lever located on top of the alloy through opening or closing a dispensing hole.

It runs on AC current 230 Volt.

It is supplied with a lid and a skimmer.
